c. Teaching Innovations

i. Major Programs Established

I developed a sexual health and reproductive epidemiology (SHARE) research group consisting of advanced doctoral students and post-doctoral mentees. The purpose is to encourage collaboration within the discipline, as well as across disciplines within the School of Public Health. Additionally, the goal is to increase productivity for our doctoral students and post-doctoral mentees. The group currently consists of 8 students and 4 faculty across disciplines within the SPH and outside the SPH (e.g. Anthropology and Psychology).

ii. Course or Curriculum Development

I redesigned EPIB/HLTH301 (Epidemiology for Public Health Practice). This course evolved from a small, intimate classroom setting of 18 in the Fall of 2015 to a class size of 233 in Spring 2019. As such a redesign was crucial to maintaining the integrity of the Public Health Science program, as well as the School. The redesign included case-based learning in efforts to reinforce course material in a more interactive manner, as well as clicker-type quiz questions throughout the lectures to engage students in applying their current knowledge to problem-solving epidemiologic “problems.”

e. Mentorship

i. Junior Faculty

Rodman Turpin, PhD
Rodman is currently on research faculty in the Department of Epidemiology and Biostatistics at The University of Maryland School of Public Health in College Park, MD. Rodman and I are spearheading collaborations with the Prince George's Health Department, The Montgomery County Health Department and DC Health Department to collaborate on efforts to address disparities in HIV and STI in the DC Metropolitan Area.

Doctoral Students

Lakeshia Watson, MPH
Lakeshia won a coveted position for the Southern region Educational Board Fellowship program. Currently I partly financially support Ms. Watson by contributing funds to match the departmental monetary support. This program trains on mentoring underrepresented students. As her mentor I receive hands on training and attend workshops on effective mentoring of underrepresented doctoral students in the STEM sciences.

Undergraduate

Justin Nwosu
University of Maryland Summer Training and Research (UM-STAR) Program
Summer 2019

Justin is in the process of assisting with a literature review and write up for a manuscript that is in preparation on social networks, stigma, resilience and PrEP use among Black men who have sex with men (and women).

Ryan Trevino
University of Maryland Summer Training and Research (UM-STAR) Program
Summer 2017

Ryan assisted in an in depth literature review aimed at better understanding the current state of research on cardiovascular disease, depression and racial discrimination. Ryan was selected to present his project that was created under my guidance at the annual McNair Scholars Symposium as well as at De Paul's annual Science, Technology, and Math Undergraduate Research Fair. Ryan won an award for his poster at the 2018 Illinois Louis Stokes Alliance for Minority Participation Symposium.
